DETAILED ACTION

(1)

Election/Restrictions

Applicant's election of Group II, claim 5 in the paper filed April 8, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

(2)

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 1-4, non-elected without traverse, have been cancelled.

(3)

Allowable Subject Matter

Claim 5 has been found to be allowable over the prior art of record.

(4)

The following is an examiner's statement of reasons for allowance:

Methods for the formation of light guiding plates, i.e., lenticular lenses, such as discloses by U.S. Patent Nos. 6,074,192 to Mikkelsen; 5,933,276 to Magee; 5,330,799 to Sandor et al.; and 5,175,030 to Lu et al., are known in the art. Mikkelsen, for example, discloses one such method wherein a stamper sleeve, fixed to a cylindrical roller through the effects of differential thermal expansion coefficients, is utilized to emboss a lens pattern into a hot-extruded resin film/sheet substrate supported by an endless conveyor. None of the prior art of record, however, specifically teach or suggests such a method, as set forth in applicant claim 5, wherein the degree of heating of both the stamper and the resin substrate are controlled relative to one another as a function of the temperature of deflection of the resin substrate under load.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
